Summary

I'm a software engineer and computer scientist interested in compilers, programming language design, distributed systems, machine learning, and scalable infrastructure design.

Education

Carnegie Mellon University — Pittsburgh, PA   2013-2016

B.S. Computer Science, University Honors

3.96 GPA, 4.0 in-major GPA

Coursework: Distributed Systems, Compiler Design, Algorithms, Machine Learning

Harvard University — Cambridge, MA   2013
Newton South High School — Newton, MA   2009-2013

Experience

Software Engineer, Facebook Inc — Menlo Park, CA   June 2016 – Present
- Engineer on Hack Language team working on scalable server architecture and language design
- https://github.com/facebook/hhvm/tree/master/hphp/hack/src

Software Engineer Intern, Facebook Inc — Menlo Park, CA   Summer 2015
- Engineering intern on Ads Measurement team
- Developed machine learning data pipielines to improve and measure ad reachability

Software Engineer Intern, Google Inc — Pittsburgh, PA   Summer 2014
- Site-reliability engineering intern on Hardware Operations SRE

Lead Teaching Assistant, Carnegie Mellon University — Pittsburgh, PA   Spring 2013 – Spring 2016
- Taught students imperative programming using C
- Managed course staff of 25 to teach over 350 students

Skills

Programming — Strong experience in Python, C, Javascript, OCaml, Java, PHP, HTML, bash scripting, CSS, SQL, Standard ML; Working knowledge of Lisp, Erlang, Go, C++, Swift, Ruby

Experience with major frameworks — React, Node.js, HHVM, MongoDB, Hadoop, Mercurial, Git, SVN, Google App Engine, Rails, Django, Wordpress, jQuery, Latex
